DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

- Figure 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1 and 3 recite a high frequency wave glass antenna for an automobile comprising a primary antenna conductor, a feeding point, a grounding conductor, and a grounded point, wherein the primary extends in a counterclockwise direction beginning at the feeding point when seen from an interior side or an exterior side of the automobile, wherein two portions of the primary antenna conductor are connected by a loop forming conductor to form a loop conductor by the primary antenna conductor and the loop forming conductor, or a portion of the primary antenna conductor and the feeding point are connected by a loop forming conductor to form a loop conductor by the primary antenna conductor, the loop forming conductor, and the feeding point, and wherein a portion or entire portion of the grounding conductor is located near to and capacitively coupled with at least one of the primary antenna conductor, the loop forming conductor and the feeding point.

Claim 2 recites a high frequency wave glass antenna for an automobile comprising a primary antenna conductor, a feeding point, a grounding conductor, and a grounded point, wherein the primary extends in a counterclockwise direction beginning at the feeding point when seen from an interior side or an exterior side of the automobile, wherein two portions of the primary antenna conductor are connected by a first loop forming conductor to form a loop conductor by the primary antenna conductor and the first loop forming conductor, or a portion of the primary antenna conductor and the feeding point are connected by a first loop forming conductor to form a first loop conductor by the primary antenna conductor, the first loop forming conductor, and the feeding point, wherein two portions of the primary antenna conductor which are not contained in the first loop conductor, are connected by a second loop forming conductor to form a second loop conductor by the primary antenna conductor and the second loop forming conductor, and wherein a portion or entire portion of the grounding conductor is located near to and capacitively coupled with at least one of the primary antenna conductor, the first loop forming conductor, the second loop conductor and the feeding point.

None of prior arts shows or suggests this glass antenna.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
